WELLNESS SITE ANALYSIS

Wind Study

The wind is coming with most frequency and intensity from the Creek Side situated south from the site. The building volume is following the same direction so the air flows around most of the facades and blows the surface heating away.

WELLNESS SITE ANALYSIS

Sun Study

The sun behavior is carefully analyzed in its path, orientation and height, and the architecture is adjusted in order to allow most natural light without reaching overheating

Inspiration

The Ritz-Carlton, Dubai, Creekside is a unique waterfront project with stunning panoramic views that overlook the Ras Al-Khor Wildlife Sanctuary, and Downtown Dubai.

Architecture and the environment combine seamlessly to create a grounded yet energizing atmosphere throughout the home.
